Hi-Clarifier

Hi-Clarifier is recommended to clarify incompatible liquid fertilisers, particularly Ammonium Poly-Phosphate, Potassium Poly-Phosphate and Sulphate containing mineral traces

Benefits

- ✓ Potential increases in plant growth rates
- ✓ Stabilise out of balance tank mixes

TYPICAL ANALYSIS	G/L	W/V %
Blended Organic Acids	1170	117

pH 1.9
SG 1.17

APPLICATION RATES

Add to APP/KPP and Hi Trace liquid blends at the rate of 10%-30% of Hi Clarifier, 1Lt of Hi-3 Trace + 2L Poly PK. May need 100-300mls Hi-Clarifier to ensure filters remain unblocked during spray applications.

For the best result, add Hi-Clarifier to tank before adding liquid fertilisers.

PACKAGING
20L, 200L and 1000L
