

Technical Brochure

- ✓ Granular blend
- ✓ Microbe stimulant
- ✓ *Protecta* enhanced

Pro N

(13.3-10.6-1.5)

A biologically enhanced granular fertiliser blend, containing a wide range of nutrients and other beneficial components to improve the soils natural release of resources

Pro N is a biologically balanced fertiliser containing NutriSmart, Mineral/Organics and DAP, protecting the balance of microbe communities and the capacity of the soil to release natural resources from the nitrogen and phosphorous soil bank. Pro N contains Protec Coating, a source of humates, fulvates and plant growth stimulants, to enhance the N and P for natural nutrient uptake stimulating early plant growth, and promotes a slower release of N

Benefits

- ✓ Significant biological improvements which will enhance the natural process of feeding the plant all its nutritional and health requirements through microbial action
- ✓ Increase root biomass for better plant uptake, growth and health in the season, whilst building soil organic matter for future value
- ✓ Improve soil structure, moisture holding capacity, and availability of nutrients and trace elements
- ✓ Persistent crop growth, long after conventional crops have finished

TYPICAL ANALYSIS

Nitrogen (N)	13.33%
Phosphorous (P)	10.67%
Potassium (K)	1.47%
Calcium (Ca)	2.71%
Magnesium (Mg)	0.34%
Sulphur (S)	6.41%
Iron (Fe)	0.81%
Sodium (Na)	0.29%
Aluminum (Al)	0.03%
Carbon (C)	3.54%
Silica (Si)	7166ppm
Zinc (Zn)	222ppm
Manganese (Mn)	823ppm
Copper (Cu)	3.8ppm
Molybdenum (Mo)	1ppm
Boron (B)	1ppm
Cobalt (Co)	19ppm

pH 7-7.5
SG 1.0
