

Technical Brochure

- ✓ Granular blend
- ✓ Microbe stimulant
- ✓ *Protecta* enhanced

Pro S10

(12.8 - 10.7 - 0)

A biologically enhanced granular fertiliser blend, containing a wide range of nutrients and other beneficial components to improve the soils natural release of resources

Pro S10 is a biologically balanced fertiliser containing NutriSmart, Mineral/Organics and DAP, protecting the balance of microbe communities and the capacity of the soil to release natural resources from the nitrogen and phosphorous soil bank. Pro S10 contains Protec Coating, a source of humates, fulvates and plant growth stimulants, to enhance the N, S and P for natural nutrient uptake stimulating early plant growth, and promotes a slower release of N and good levels of S

Benefits

- ✓ Significant biological improvements which will enhance the natural process of feeding the plant all its nutritional and health requirements through microbial action
- ✓ Increase root biomass for better plant uptake, growth and health in the season, whilst building soil organic matter for future value
- ✓ Improve soil structure, moisture holding capacity, and availability of nutrients and trace elements
- ✓ Persistent crop growth, long after conventional crops have finished

TYPICAL ANALYSIS

Nitrogen (N)	12.80%
Phosphorous (P)	10.70%
Potassium (K)	0.23%
Potassium (K)	0.25%
Calcium (Ca)	1.66%
Magnesium (Mg)	0.89%
Sulphur (S)	10.40%
Iron (Fe)	1.39%
Sodium (Na)	0.08%
Aluminum (Al)	0.33%
Carbon (C)	4.0%
Silica (Si)	2229ppm
Zinc (Zn)	180ppm
Manganese (Mn)	907ppm
Copper (Cu)	17ppm
Molybdenum (Mo)	2.5ppm
Boron (B)	17ppm
Cobalt (Co)	40ppm

pH 7-7.5
SG 1.0
