

Technical Brochure

✓ Anti Foaming Agent

Anti-Foam

A de-foaming agent for adding to tank mixes with known potential for excessive foaming

Benefits

- ✓ Reduce excessive foaming causing problems during tank mixing and product application
- ✓ Once foaming has occurred, Anti-Foam can be used to reduce further foaming. Anti-Foam is not designed to remove foam that has already occurred.

pH 6.1
SG 1.45

APPLICATION RATES

Tank mix	Add water to tank, then add Anti-Foam at 250-500ml per 1000L of water, prior to other products. Always add wetting agent or surfactant last.
----------	--

NOTE: Add wetting agent or surfactant to tank mix last, after all other additions to minimize foaming.

PACKAGING
20L, 200L and 1000L
