Hi-Boron

A high concentrate liquid boron fertiliser suitable for foliar and fertigation applications

Hi-Boron can be utilised to balance soils back to required critical levels, and to attain optimal seasonal nutrient balance in plant and production. Foliar or soil application decisions are best made when based on soil and/or tissue test results. Testing history will help determine the requirement for a preventative application before deficiencies become severe.

Benefits

- ✓ A cost effective and powerful format of Boron.
- ✓ Increase grain hardness and improve grain fill.
- ✓ Improve cell walls and tissue structure.
- ✓ Increase carbohydrate metabolism and the translocation of sugars.
- ✓ Boron is essential for pollen vitality.
- ✓ Boron for mobilising calcium.
