Hi-Cop

A high concentrate chelated liquid copper compound with fulvic acid suitable for foliar, fertigation and furrow applications

A user-friendly and widely compatible liquid copper. Hi-Cop can be utilized to balance soils back to required critical levels, and to attain optimal seasonal nutrient balance in plant and produce. Foliar or soil application decisions are best made when based on soil and/or tissue test results. Testing history will help determine the requirement for a preventative application before deficiencies become severe

Benefits

- ✓ A Cost effective and powerful format of Copper
- ✓ Essential element for many major plant functions including photosynthesis and respiration
- ✓ Ensures optimal functions such as plant metabolism of carbohydrates and proteins
- ✓ Copper can improve colour and flavour intensity in vegetables and colour in flowers
- ✓ Excess potassium, phosphorous or other micronutrients can indirectly cause copper deficiency

TYPICAL ANALYSIS

	G/L	W/V%	W/W %
Copper (Cu)	80	8.00	6.8
Sulphur (S)	40	4.00	3.4

pH 1.3
SG 1.18

APPLICATION RATES

Foliar	Rate/Ha	Water
Broadacre	0.2-1.5L	50-150L
Viticulture/Horticulture	0.2-2L	200-1200L
Orchards (not to be used on stone fruit)	0.2-0.5L	600-1500L
Furrow injection	Rate/Ha	Water
Cereals, Maize, Canola, Sorghum, Cotton, Legumes	0.5-3L	80L
Fertigation	Rate/Ha	Water
All crops	1-5L	Variable

Important: Do not foliar spray any crop during flowering

PACKAGING
20L, 200L and 1000L

Version Created: 27-Jun-19
