Application Rates

Foliar	Rate/Ha	Water	Fertigation	Rate/Ha	Water
Vegetables	5 – 10L	100L	All crops	2-10L	variable
Orchards; Ornamentals & Turf	2 – 6L	100L			
Vineyards;	2 – 5L	100L			
Broad acre Crops	2 - 6L/ha	60 - 100L			
Pasture	2 - 6L/ha	60 – 100L			
Spot Spraying	100mL	1L			

Important: 1. Where higher water is required for good foliar coverage, do not exceed product rate/ha

2. Avoid spraying close to harvest if produce is susceptible to staining
3. Not compatible with soluble calcium-based inputs.
4. Do not foliar spray until seedlings are 15cm high or until there is sufficient leaf area for good coverage
